

imi PharmaTrain Career Driver

LET YOUR COLLEAGUES KNOW

Trainers' blog

"Using the PharmaTrain Shared Standards the Hibernia College has created the new PharmaTrain online Master programme of Medicines Development and was awarded the first PharmaTrain Centre of Excellence together with three full scale e-Electives (125 learning hours/5 ECTS points each) as assessed by full compliance with the present criteria. Hibernia College has also contributed to other e-compact products (1 ECTS each) of the e-library to complement face-to-face training. Hibernia College is one of the 14 training providing partners in PharmaTrain and the only one offering a complete e-Master – 80% online and 20% face-to-face. But these are only few products of the sizeable Hibernia e-portfolio: www.hiberniacollege.com"

Jeremy Whitty
Hibernia College Dublin

Online learning or e-learning has emerged as an increasingly important tool in today's teaching efforts. It is blended with other pedagogical methods including face-to-face teaching. With predefined reading from textbooks, reference documents or scientific articles the modular PharmaTrain e-library is tailored towards reaching the learning outcomes of the PharmaTrain Syllabus 2010. The e-library is being created to enrich and broaden training access for all professionals in Europe.

My view

"I graduated from ECPM in 2011. Participation in the course helped me with seeing "the whole picture" of drug development. When one works in certain area of drug development, one has good knowledge of his or her own area, such as drug safety or regulatory affairs or pre-clinical development. The course helped me to see the way of a new medicine from molecule screening until the registration and marketing. I then decided to continue with master course study. E-learning will now play a bigger role for me because it fits my restriction in time and traveling."

Maria Solonets

Industry's Voice

Online training in Medicines Development has been recognised by our company almost a decade ago and we have helped to get Hibernia College going. Some of this early experience has paved the way towards creation of Introduction to Medicines Development which PharmaTrain plans to use in all its training programmes as well as a standalone (e1-compact, ECTS point in the **PharmaTrain e-library**, www.pharmatrain.eu).

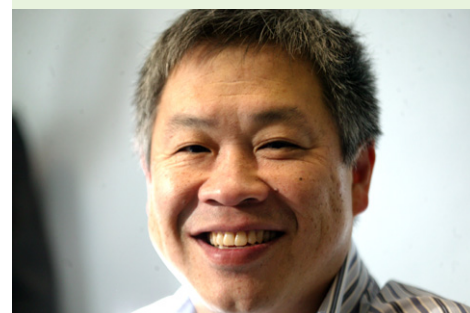

"Over the last few years, e-teaching technology has become more attractive and more interactive. All training will have some blending with online segment in the future."

Anthony Chan, Pfizer

Fritz R. Bühler, PharmaTrain Coordinator, congratulating Jeremy Whitty from Hibernia College to the first PharmaTrain Center of Excellence Award.

The PharmaTrain Career Drivers are being distributed via the individual communication pathways of our 15 private (industry) partners in PharmaTrain as well as via the Alumni Network i.e. by all former trainees registered at one or the other collaborative training centre – word by mouth!
